

## ИСТОРИЯ, ИКОНОМИКА, ПОЛИТИКА

„History is a gallery of pictures in which there are few originals and many copies.”

[Alexis de Tocqueville](#)

„Историята е най-добрият учител, който има най-лошите ученици.“

Индира Ганди

Представяме ви заглавия и автори, цитирани в лекциите на двама от гост-лекторите на семинара в Троян (15-21 август 2011 г.).

[Карло Лотиери](#) се спря на въпроси, свързани с произхода и същността на държавата; правителството, политическата теология; видовете собственост и взаимодействията между тях. Сред авторите, които цитира, бяха Аристотел, сър Едуард Коук, Макс Вебер и Жюл Мишле. Историята на Средновековието беше отправна точка за обяснението на произхода и същността на понятия като търговия, пазар, инициативност, управление, собственост.

Жюл Мишле (1798 - 1874) е френски историк, считан от някои изследователи за автор на термина Ренесанс (Възраждане). Карло Лотиери цитира неговия труд, посветен на историята на Френската революция. В библиотеката разполагаме с други значими заглавия, посветени на Френската революция и нейното значение.

### ***The French Revolution: An Economic Interpretation***

Florin Aftalion

Cambridge University Press, 1989

*The economic history of revolutionary France is still a neglected area in studies of the revolution of 1789. While some attention has been given to the condition of the peasants, the urban working classes and the financial crisis of the Ancien Régime, there has been a general tendency to regard economic factors as external and*

somewhat peripheral to the truly political nature of the Revolution. This book is designed to redress the balance, providing a clear, accessible and thought-provoking guide to the economic background to the French Revolution. Professor Aftalion analyzes the policies followed by successive Revolutionary assemblies, examining in detail taxation, the confiscation of church property, the assignats, and the siege economy of the Terror.

### ***Lectures on the French Revolution***

John Emerich Edward Dalberg-Acton

Liberty Fund, 2000

*Delivered at Cambridge University between 1895 and 1899, Lectures on the French Revolution is a distinguished account of the entire epochal chapter in French experience by one of the most remarkable English historians of the nineteenth century. In contrast to [Burke](#) a century before, Acton leaves condemnation of the French Revolution to others. He provides a disciplined, thorough, and elegant history of the actual events of the bloody episode—in sum, as thorough a record as could be constructed in his time of the actual actions of the government of France during the Revolution. There are twenty-two essays, commencing with “The Heralds of the Revolution,” in which Acton presents a taxonomy of the intellectual ferment that preceded—and prepared—the Revolution.*

### ***The Origin and Principles of the American Revolution, Compared with the Origin and Principles of the French Revolution***

Friedrich von Gentz

Liberty Fund, 2009

*“The Revolution of North America, had, in the course of events, been the nearest neighbor to that of France. A very considerable part of those, who were cotemporaries and witnesses of the latter, had likewise survived the former. Some of the most important personages, who made a figure in the French revolution scarce ten years before, had been active on the theatre of that in America.”*

[Грегъри Ремке](#) се спря на проблемите на възникването на градовете, превръщането им в центрове на размяна; обособяването им в търговски, административни, културни и политически средища.

Някои от заглавията и авторите, които Ремке цитира в своите лекции.

**Владетелят**

Николо Макиавели

Панорама груп ЕООД, 2011

*Макиавели говори за политиката като за наука и изкуство, като за пръв път възприема държавата в смисъл, близък до съвременния – властническа обществена организация. За Макиавели властта е само тогава истинска държавна власт, когато се крепи на законите и служи на правото. Той ... става първият идеолог на обединена Италия - независима национална държава, в която религията трябва да играе минимална роля.*
